Baroid

In Cooperation with:

Colorado Water Well Contractors Association
Geothermal Heat Pump Consortium
International Ground Source Heat Pump Association

Forum Date:

Tuesday, September 22, 2009 - 8:00 am - 4:45 pm

Forum Hotel:

**Holiday Inn - Denver West Village
14707 W. Colfax Avenue, Golden, CO 80401, Telephone: 303-279-7611**

CONTINUING EDUCATION CREDIT AVAILABLE - CALL THE AGWT FOR DETAILS 800-423-7748

COLORADO ARCHITECT CREDITS - FORUM QUALIFIES FOR 7.0 CONTINUING EDUCATION CREDITS UNDER RULE 4.9.3.1.2.10 OF THE CO STATE BOARD OF LICENSURE FOR ARCHITECTS (A STRUCTURED REPORT (DORA) WILL BE PROVIDED; RULE 4.9.3.1.2.9)

**AIA ARCHITECT CREDITS - 7.25 LUs (FOR HSW AND SUSTAINABLE DEVELOPMENT) THROUGH THE AIA
AMERICAN SOCIETY OF HOME INSPECTORS - 7.0 ASHI® CE CREDITS (PENDING RENEWAL APPROVAL)
CO DRILLING CONTRACTORS - 5 CEU HOURS THROUGH THE COLORADO BOARD OF EXAMINERS**

What's It All About?

Today's ground source heating and cooling (GSHC) technology provides a proven method for saving significant amounts of energy for heating, cooling and hot water generation for ANY application. Thousands of homes, businesses and manufacturing plants across the nation are already taking advantage of these energy-efficient conditioning systems. GSHC systems operate at significantly lower costs than traditional gas, oil or electric-based installations. National benefits from geoexchange installations include less demand for energy generation capacity, reduction in green-house gas emissions and a reduced dependence on imports of oil and other fossil fuels.

By definition, installation of ground source systems involves accessing the sub-surface by either excavation or by drilling vertical bores. Because the sub-surface heat-exchange process occurs near or beneath the ground water table, environmental and water resource regulatory questions about design and installation have been raised in some states.

This one-day program will:

- Define the "state of the art" in terms of design options and economic pay-back
- Demonstrate the environmental and strategic benefits of the technology
- Dispel common myths about the effectiveness, reliability and safety of ground source systems
- Explain industry-accepted installation, operation and maintenance practices
- Provide an update on state, local and regulatory oversight recommendations

Questions to be considered include:

- Are there any environmental or economic risks associated with this technology?
- Are there data that clearly demonstrate risk cause and effect?
- Do design and installation standards provide adequate environmental protection?
- Should specific professional training be required for the below-ground system installation?
- Which agencies should, or do, have, regulatory oversight for heat exchange installations?
- What are the barriers to widespread adoption of the technology for new buildings or for homeowner retrofit? What can be done to eliminate these barriers?

The Forum program draws on the experience & expertise of industry and agency professionals and will provide a unique opportunity for exchange of information among policy makers involved in energy issues and specialists involved with the design, construction and permitting of ground source geoexchange systems for cooling and heating.

Who Should Attend?

This program will be of interest to professionals who design, install, inspect, approve, recommend or regulate these systems. This technology has the potential to become the technology of choice among those considering "green energy" alternatives for commercial or residential installations.

Energy company engineers, architects, planners and conservation commissioners, building code inspectors, environmental health professionals, home inspectors, water well contractors, HVAC professionals, real estate agents, home builders and developers, town officials (Conservation, Zoning, Planning), water testing specialists should not miss this opportunity to get up to speed with this technology. It will be coming to a building near you!

American Ground Water Trust

The American Ground Water Trust is a national not-for-profit public education organization. The Trust's mission:

- ◆ Promoting efficient and effective ground water management
- ◆ Communicating the environmental and economic value of ground water
- ◆ Showcasing ground water science and technology solutions
- ◆ Increasing citizen, community and decision-maker awareness
- ◆ Facilitating stakeholder participation in water resource decisions

Forum Program (continued)

11:15 am – 12:00 pm

GEOEXCHANGE WELL CONSTRUCTION for THERMAL EFFICIENCY and ENVIRONMENTAL PROTECTION

Mike Everett, Principal, Rocky Mountain Geothermal, Centennial, CO (Invited)

- Review of typical Colorado installations. Is there a “good, better or best” type?
- The basis for selecting installation materials (well casing, grout, propylene glycol, methyl alcohol. etc/)
- Use of an existing well for a geothermal application. Can it be done?
- How does a ground source heat pump well differ from a drinking water well?
- Common problems that can result from installation errors
- What to do if a closed loop develops a problem, etc.

12:00 – 1:00 pm

LUNCH (Provided on site) / **EXHIBITS OPEN**

1:00 - 1:10 pm

GEOHERMAL HEAT PUMP CONSORTIUM - GEOHERMAL HEAT PUMP TRADE GROUP

John Kelly, Executive Director, Geothermal Heat Pump Consortium, Washington DC

1:10 – 1:30 pm

THERMAL GROUTS - TYPES and PROPERTIES

Dave Wilson, Senior Field Services Technical Representative, Baroid IDP, Denver, CO

- Why grout a ground source heat pump boring?
 - Energy (heat) transfer media efficiency
 - Ground water protection
- What are the properties of an efficient and effective thermal grout?

1:30 – 2:10 pm

ECONOMIC SUCCESS STORIES – THE PAYBACK - Residential, Commercial and Industrial

Craig Fischbach, Commercial Sales Mgr, FHP Manufacturing, Denver, CO

- How to do the short-term and long-term math on energy saving vs. installation cost?
- What is the typical payback period and Return on investment (ROI)?
- How do geothermal installations add equity value to a property?
- What are the typical servicing and maintenance needs and costs for a geothermal system?
- What is the relationship among architect, system designer and installer? (Who is selling to whom?)
- Case studies of installation and operation in Colorado (homes, churches, schools, offices etc.)

2:10 pm – 2:50 pm

GEOEXCHANGE SYSTEM INSTALLATIONS The LEED PERSPECTIVE

Peter Jefferson, Principal, M.E. Group, Denver, CO

- What is Leadership in Energy and Environmental Design (LEED)?
- Overview of the various Green Building rating systems:
 - United States Green Building Council (USGBC)
- Overview of the LEED rating systems - Commercial vs. Residential
- How is a building's heating and cooling system (energy-use) evaluated in the LEED rating system?
- How do Ground Source Heating and Cooling systems achieve LEED rating points?

Forum Program (continued)

2:50 pm – 3:05 pm

NETWORKING BREAK / EXHIBITS OPEN

3:05 pm - 3:50

THE UTILITY PERSPECTIVE ON GROUND SOURCE HEAT PUMPS

Ed Maycumber, Member Services Representative, United Power Inc., Brighton, CO

- How do GSHPs improve load factors and peak use intervals?
- Peak Shaving and Valley Filling - how does it work?
- Carbon footprints - GSHPs compared to traditional fossil-fuel space-heating and conventional cooling methods.
- How does a GSHP contribute to efficient energy use?
- Why should a utility offer rebates to GSHP users?

3:50 pm – 4:30 pm

GEOEXCHANGE INSTALLATIONS

STATE and LOCAL RULES and REGULATIONS

Scott Cuthbertson, Assistant State Engineer, Colorado Div. of Water Resources, Denver, CO

- What regulatory differences apply among a “wet rock” Geothermal well system, a “dry rock” Geothermal well system and a Geoexchange boring for a home or commercial ground source heat pump system?
- Well Construction Standards: Rules setting forth proper installation requirements to protect ground water quality
- Permitting requirements for installation of a Geothermal or Geoexchange system”
- Permitting considerations for “open loop” Geoexchange systems
- Licensing requirements for Geoexchange borings and heat-exchange equipment installers

4:30 – 4:45 pm

Wrap-up and Adjourn

- Further Questions and CEU sign-out
- Colorado Architects complete the Colorado Department of Regulatory Agencies “Continuing Education Structured Report”

Registration Form

Ground Source Heating & Cooling for Residential and Commercial Properties Latest Technologies, Economic Advantages, Environmental Impacts and Regulations

DATE: Tuesday, September 22, 2009 - 8:00 am - 4:45 pm
LOCATION: Holiday Inn – Denver West Village, Golden, CO

PRE REGISTRATION (GENERAL)

CHECK BOX

\$185

PRE REGISTRATION (TRUST CORPORATE MEMBERS)

\$150

ON-SITE REGISTRATION

\$225

EXHIBIT TABLE (DOES NOT INCLUDE REGISTRATION)

\$200

(Registration includes workshop handouts, coffee breaks and lunch)

PAYMENT: **Check** *[Make checks payable to: American Ground Water Trust]*

AMEX **Visa** **MasterCard** **PO**

Credit Card No. _____ Exp _____

CANCELLATION POLICY

- Cancellations received in the Trust office by 5 pm ET 15 days prior to event will be granted a full refund less \$25.
- Cancellation 14 days or less, prior to the event will receive a 50 % refund.
- Cancellations on the day of the event are considered "No Shows."
- Refunds will not be granted for "No Shows" (substitutions gladly accepted).
- The Trust will not cancel a conference program because of bad weather conditions. Except that, as the result of an event cancellation resulting from, (but not limited to) circumstances such as a state mandatory evacuation or a fire at the program facility, the Trust will reschedule the event and honor registrations as payment for the new event.
