USING THE EARTH'S RENEWABLE ENERGY

Ground Source Heating & Cooling for Residential and Commercial Properties

Latest Technologies, Economic Advantages,
Environmental Impacts and Regulations

Presented by

American Ground Water Trust

50 Pleasant Street, Concord, NH

Ground Water Information, Awareness & Education Since 1986

Thank you to our Sponsors

In Cooperation with:

Geothermal Heat Pump Consortium
International Ground Source Heat Pump Association
Massachusetts Ground Water Association
New Hampshire Water Well Association
Connecticut Water Well Association

Forum Date:

Wednesday, July 29, 2009 - 8:00 am - 4:45 pm

Forum Hotel:

**Sheraton Four Points Hotel -- 99 Erdman Way, Leominster, MA 01453
Telephone: 978-534-9000**

CONTINUING EDUCATION CREDIT AVAILABLE - CALL THE AGWT FOR DETAILS 800-423-7748

ARCHITECT CREDITS - 7.25 LUS (FOR HSW AND SUSTAINABLE DEVELOPMENT) THROUGH THE AIA

AMERICAN SOCIETY OF HOME INSPECTORS - 7.0 ASHI® CE CREDITS

CONNECTICUT HOME INSPECTORS - 7.25 CE HRS CREDIT PENDING THROUGH THE CT DEPT OF CONSUMER PROTECTION

CONNECTICUT PUMP INSTALLERS - PENDING THROUGH THE CT WATER WELL ASSOCIATION

NH PUMP INSTALLERS - 2 CE HOURS THROUGH THE NH WATER WELL BOARD

NH WATER WELL DRILLERS - 2 CE HOURS THROUGH THE NH WATER WELL BOARD

MASSACHUSETTS HOME INSPECTORS - 6.0 CE HOURS THROUGH THE DIVISION OF PROFESSIONAL LICENSURE

What's It All About?

Today's ground source heating and cooling (GSHC) technology provides a proven method for saving significant amounts of energy for heating, cooling and hot water generation for ANY application. Thousands of homes, businesses and manufacturing plants across the nation are already taking advantage of these energy-efficient conditioning systems. GSHC systems operate at significantly lower costs than traditional gas, oil or electric-based installations. National benefits from geexchange installations include less demand for energy generation capacity, reduction in green-house gas emissions and a reduced dependence on imports of oil and other fossil fuels.

By definition, installation of ground source systems involves accessing the sub-surface by either excavation or by drilling vertical bores. Because the sub-surface heat-exchange process occurs near or beneath the ground water table, environmental and water resource regulatory questions about design and installation have been raised in some states.

This one-day program will:

- Define the "state of the art" in terms of design options and economic pay-back
- Demonstrate the environmental and strategic benefits of the technology
- Dispel common myths about the effectiveness, reliability and safety of ground source systems
- Explain industry-accepted installation, operation and maintenance practices
- Provide an update on state, local and regulatory oversight recommendations

Questions to be considered include:

- Are there any environmental or economic risks associated with this technology?
- Are there data that clearly demonstrate risk cause and effect?
- Do design and installation standards provide adequate environmental protection?
- Should specific professional training be required for the below-ground system installation?
- Which agencies should, or do, have, regulatory oversight for heat exchange installations?
- What are the barriers to widespread adoption of the technology for new buildings or for homeowner retrofit? What can be done to eliminate these barriers?

The Forum program draws on the experience & expertise of industry and agency professionals and will provide a unique opportunity for exchange of information among policy makers involved in energy issues and specialists involved with the design, construction and permitting of ground source geexchange systems for cooling and heating.

Who Should Attend?

This program will be of interest to professionals who design, install, inspect, approve, recommend or regulate these systems. This technology has the potential to become the technology of choice among those considering "green energy" alternatives for commercial or residential installations.

Energy company engineers, architects, planners and conservation commissioners, building code inspectors, environmental health professionals, home inspectors, water well contractors, HVAC professionals, real estate agents, home builders and developers, town officials (Conservation, Zoning, Planning), water testing specialists should not miss this opportunity to get up to speed with this technology. It will be coming to a building near you!

American Ground Water Trust

The American Ground Water Trust is a national not-for-profit public education organization. The Trust's mission:

- ◆ Promoting efficient and effective ground water management
- ◆ Communicating the environmental and economic value of ground water
- ◆ Showcasing ground water science and technology solutions
- ◆ Increasing citizen, community and decision-maker awareness
- ◆ Facilitating stakeholder participation in water resource decisions

Forum Program (continued)

11:35 – 12:10 pm

GEOEXCHANGE WELL CONSTRUCTION for THERMAL EFFICIENCY and ENVIRONMENTAL PROTECTION

Tom Ogden Jr., President, Ogden Well and Pump Co, Tewksbury, MA and
President, Massachusetts Ground Water Association

- An Overview of the geology of the Northwest and how it affects GSHC borings and loop systems
- Drilling Techniques - Advantages / Disadvantages for GSHC system projects
- The basis for selecting installation materials (well casing, grout, propylene glycol, methyl alcohol. etc/)
- Use of an existing well for a geothermal application. Can it be done?
- How does a ground source heat pump well differ from a drinking water well?
- Common problems that can result from installation errors
- What to do if a closed loop develops a problem, etc.

12:10 – 1:10 pm

LUNCH (Provided on site)

1:10 – 1:25 pm

THERMAL GROUTS - TYPES and PROPERTIES

Dennis Duty, Senior Field Services Technical Representative, Baroid IDP, Marion, IA

- Why grout a ground source heat pump boring?
 - Energy (heat) transfer media efficiency
 - Ground water protection
- What are the properties of an efficient and effective thermal grout?

1:25 – 2:10 pm

ECONOMIC SUCCESS STORIES – THE PAYBACK - Residential, Commercial and Industrial

Keith McBrien, Project Manager, GDS Associates, Manchester, NH

- How to do the short-term and long-term math on energy saving vs. installation cost?
- What is the typical payback period and Return on investment (ROI)?
- How is cash flow affected by installing a GSHP system verses a fossil fuel system.
- How do geothermal installations add equity value to a property?
- What are the typical servicing and maintenance needs and costs for a geothermal system?
- What is the relationship among architect, system designer and installer? (Who is selling to whom?)

2:10 – 2:50 pm

GEOEXCHANGE SYSTEM INSTALLATIONS CASE STUDY - The Joseph Story House Renovation, Salem, MA

Neil Chayet, J.D., President, Chayet Communications Group, Boston, MA and
Host of CBS/WBZ radio feature "Looking at the Law"

- What is Leadership in Energy and Environmental Design (LEED)?
- Overview of the United States Green Building Council (USGBC)
- Overview of the LEED rating systems - Commercial vs. Residential
- How is a building's heating and cooling system (energy-use) evaluated in the LEED rating system?
- How do Ground Source Heating and Cooling systems achieve LEED rating points?

Forum Program (continued)

2:50 – 3:05 pm

NETWORKING BREAK

3:05 – 4:00 pm

GLOBAL WARMING and GEOTHERMAL HEAT PUMPS

John D. Manning, P.E., President, Earth Sensitive Solutions, LLC, Auburn, NY

- Global Warming – Fact or Fiction
- Hydrocarbon Beneficiaries Own the Responsibility
- The Carbon Footprint of being comfortable
- The GHP Opportunity
- Examples of Seizing the Opportunity

4:00 – 4:40 pm

GEOEXCHANGE INSTALLATIONS STATE and LOCAL RULES and REGULATIONS

Joe Cerutti, Hydrogeologist, MA Dept of Environmental Protection, Boston, MA

- Current regulatory requirements in Massachusetts (state and local)
- Application submittal requirements for installation of a geothermal well/system
- Well construction requirements
- Licensing requirements and responsibilities for geothermal well and heat-exchange equipment installers
- Water quality testing requirements for open-loop wells
- Environmental and health concerns from installation and/or operation of geothermal wells/systems

4:40 – 4:45 pm

Wrap-up and Adjourn

- Further Questions and CEU sign-out

Registration Form

Ground Source Heating & Cooling for Residential and Commercial Properties Latest Technologies, Economic Advantages, Environmental Impacts and Regulations

DATE: Wednesday, July 29, 2009 - 8:00 am - 4:45 pm

LOCATION: Sheraton Four Points Hotel -- 99 Erdman Way, Leominster, MA 01453, Telephone: 978-534-9000

	CHECK BOX
PRE REGISTRATION (GENERAL)	\$185 <input type="checkbox"/>
PRE REGISTRATION (TRUST CORPORATE MEMBERS)	\$150 <input type="checkbox"/>
ON-SITE REGISTRATION	\$225 <input type="checkbox"/>
EXHIBIT TABLE (DOES NOT INCLUDE REGISTRATION)	\$200 <input type="checkbox"/>

(Registration includes workshop handouts, coffee breaks and lunch)

PAYMENT: Check *[Make checks payable to: American Ground Water Trust]*

CANCELLATION POLICY

- Cancellations received in the Trust office by 5 pm ET 15 days prior to event will be granted a full refund less \$25.
- Cancellation 14 days or less, prior to the event will receive a 50 % refund.
- Cancellations on the day of the event are considered "No Shows."
- Refunds will not be granted for "No Shows" (substitutions gladly accepted).
- The Trust will not cancel a conference program because of bad weather conditions. Except that, as the result of an event cancellation resulting from, (but not limited to) circumstances such as a state mandatory evacuation or a fire at the program facility, the Trust will reschedule the event and honor registrations as payment for the new event.
