

Ground Water Institute for Teachers[®]

Tuesday, November 9 & Wednesday, November 10, 2010

Western Municipal Water District
~ Operations Center ~
16451 El Sobrante Road, Riverside 92503

Western Municipal Water District, in cooperation with the American Ground Water Trust and the U.S. Geological Survey will host the 5th Ground Water Institute for Teachers, a FREE professional training workshop, on Wednesday, November 9th, ~ 4:00pm to 8:00pm and Thursday, November 10th ~ 8:30am to 4:00pm.

This two-day Institute provides teachers in Riverside County with a unique opportunity to explore various aspects of science as it relates to ground water.

Water science and water management experts from the water industry and government agencies will provide demonstrations, lectures, hands-on activities, curriculum demonstrations and field trips to give you the full California ground water picture!

The principal objective of the Institute program is to show the application of science to practical water resources issues and to encourage teachers to integrate basic hydrologic concepts into their lesson plans.

The American Ground Water Trust, which heads up the Institute program, is a nonprofit educational organization that organizes workshops, training and conference education programs nationwide with a focus on protecting ground water and promoting resource sustainability; communicating the environmental and economic value on ground water; and increasing citizen, community and decision-maker awareness.

The Institute program has been a success with teachers continuing to share what they've learned with the hundreds of students they educate each year.

To register go back to
<http://www.agwt.org/teachers/institutehome.htm>

Free substitute reimbursement will be offered to the first 20 teachers who register. Enrollment is limited.

Questions? Please contact Rebecca Holtzclaw, Western Municipal Water District, (951) 789-5061 or e-mail her at rholtzclaw@wmwd.com.

Hope to see you in November!
